## NEO Earth Close Approaches

[Introduction](#) [Tutorial](#) [Data Table](#) [Comets \(pre-1900\)](#) [Uncertainties](#)

### Close Approach Data

The following table shows close approaches to the Earth by near-Earth objects (NEOs) limited as selected in the "Table Settings" below. Data are not available prior to 1900 A.D. nor after 2200 A.D. Data are further limited to encounters with [reasonably low uncertainty](#).

Check out our [brief video tutorial](#).

Table Settings:

Near future (within 60 days)

Nominal dist. <= 0.05au

no H limit
